## Welcome to the Coop Newsletter!

### Propane and Fuel Customers

With the extreme cold weather that we are having we would like to remind our customers to check their tanks. **A good practice is to call in your order when your tank is around 25% or ¼ of a tank.** Also do an inspection around your tank. Is the pathway to your tank clear of debris for the driver to make a *safe delivery*? Please make sure driveways and a path to the tank is cleared after a storm. Orders can be placed Monday – Friday from 8:00AM – 5:00 PM. *Emergency numbers are 800-253-6269 (Brooks Office) or 800-777-7619 (TRF Office).*

### Patronage

Year-to-date the Co-op has returned close to \$300,000 dollars back to our patrons through Retirement of Estates, Age 72 Stock Retirements and Revolving Stock Pay-outs. We still have many accounts that we do not have a date of birth on record. If you feel you should have been receiving a pay-out please contact our office.

### Convenience Stores

**HELP WANTED – Part-time day, evening and weekend shifts available in Brooks and McIntosh. Stop by the store and talk with the store manager.** *Check out the Monthly Store and Deli Specials.*

### Agronomy

#### A New Year with New Technology

This year we will be offering variable rate technology with one of our Terragators. We made the purchase for a VR machine after hearing and feeling the buzz on variable rate fertilizer. We see the industry going this way with all the advancements in technology and wanted to have this option for our area farmers. We are excited to be offering this to our patrons and hope with good planning and variable rate precision we can help increase farm profitability.

# HAPPY NEW YEAR!!
